DETAILED ACTION

Election/Restrictions

1. In view of Applicants' arguments found in the response filed September 30, 2003, the Examiner hereby withdraws any previous restriction requirements. All the claims have been examined on the merits.

Response to Arguments

2. Applicant's arguments with respect to claims 1-8 and 11 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. **Claims 7 and 24-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.**

5. Claim 7 recites the limitation "the method" in the first line of claim 7. There is insufficient antecedent basis for this limitation in the claim.

6. Claims 24-26 recite, or incorporate by dependency, the limitation "the at least one magnetic sensor" found in the lines 3-4 of claim 24. There is insufficient antecedent basis for this limitation in the claims.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

8. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent 6,215,318 to Schoefthaler et al. (hereinafter “Schoefthaler”).

As seen in his Figure 4, Schoefthaler discloses an apparatus, comprising:

- a) a micro machined optical element (100); and
- b) a magnetic sensor (200) disposed on the micro machined optical element.

9. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by US 2003/0117027 to Rybnicek et al. (hereinafter “Rybnicek”).

Rybnicek discloses an apparatus, comprising:

- a) a micro machined optical element (320); and
- b) a magnetic sensor (210 and/or 230) disposed on the micro machined optical element.

See Rybnicek at sections [0085], [0087], and [0110].

Allowable Subject Matter

10. Claims 2-6 and 8-23 are allowed.
11. Claims 7 and 24-26 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph.
12. The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 2, the prior art does not disclose or suggest that the magnetic sensor senses a magnetic field that is used to actuate the micro machined optical element.

Regarding claims 3-10, the prior art does not disclose or suggest that the micro machined optical element includes a moveable portion and at least one magnetic sensor is disposed on the moveable portion.

Regarding claims 11-23, the prior art does not disclose or suggest that the magnetic sensor senses a sense magnetic field that is separate from a magnetic field that actuates the micro machined optical element.

Regarding claims 24-26, it does not appear that it would have been obvious to provide either Schoefthaler or Rybnicek with a means for compensating for a change in the property of the magnetic sensor with temperature.
